JULY 1, 2000**

The Retirement Board
State Teachers Retirement System of Ohio
275 East Broad Street
Columbus, Ohio 43215

Ladies and Gentlemen:

This report presents the results of the annual actuarial valuation of the assets and liabilities of the State Teachers Retirement System of Ohio (STRS Ohio) as of July 1, 2000, prepared in accordance with Section 3307.20 of Chapter 3307 of the Ohio Revised Code. The valuation takes into account all of the promised benefits to which members are entitled, including pension and survivor benefits.

The valuation was based on the actuarial assumptions and methods as adopted by the Board of Trustees, including a valuation interest rate of 7¼% per annum compounded annually. The interest rate assumption has changed from the prior valuation interest rate of 7½% per annum compounded annually. The other assumptions and methods are unchanged from the prior valuation.

The actuarial assumptions and methods comply with the parameters set forth in Governmental Accounting Standards No. 25.

Assets and Membership Data

The individual data for members of the System as of the valuation date were reported to the actuary by STRS Ohio. While we did not verify the data at their source, we did perform tests for internal consistency and reasonableness. The amount of assets in the trust fund taken into account in the valuation was based on statements prepared for us by STRS Ohio.

Funding Adequacy

Historically, of the total contribution rate of 23.3% from employers and members, 2% was allocated to the health care fund with 21.3% remaining for pension and survivor benefits. For fiscal 1998 through 2000, additional employer contributions were allocated toward health care. The health care contribution for fiscal 1998 was 3.5%. The health care contributions for fiscal 1999 and fiscal 2000 were 8%. For fiscal 2001 and after, the Board has permanently increased the allocation toward health care to 4.5%, leaving 18.8% for pension and survivor benefits. The valuation indicates that a contribution rate of 18.8% is sufficient to provide for the payment of the promised pension and survivor benefits, with a 23.1 year funding period to amortize the unfunded accrued liability. The funding period was increased 6.8 years from last year's funding period (i.e., increased from 16.3 years to 23.1 years). The funding period

increased because the increased contribution allocation toward health care resulted in a decrease in the contribution allocation toward the unfunded accrued liability.

The valuation indicates that for the fiscal year ending June 30, 2000, the actuarial experience of STRS Ohio was favorable and generated net actuarial gains of \$2,108 million. The benefit improvements and interest rate change reduced the gain by \$935 million. The Board elected to use \$50.8 million of the actuarial gain to fund the supplemental benefit payments to retirees to be made during December 2000. The Board elected to use the remainder of the gain to reduce the unfunded accrued liability.

Financial Results and Membership Data

Detailed summaries of the financial results of the valuation and membership data used in preparing the valuation are shown in the valuation report. Supporting schedules included in the Actuarial and Statistical Section of STRS Comprehensive Annual Financial Report were prepared by the actuary. The trend data schedules included in the Financial Section of STRS Comprehensive Annual Financial Report were prepared by the actuary.

The valuations were completed by qualified actuaries in accordance with accepted actuarial procedures as prescribed by the Actuarial Standards Board. The qualified actuaries are members of the American Academy of Actuaries and are experienced in performing actuarial valuations of public employee retirement systems. To the best of our knowledge, this report is complete and accurate and has been prepared in accordance with generally accepted actuarial principles and practice.

Respectfully submitted,

SUMMARY OF RESULTS	1 - 10
TABLES AND SCHEDULES	11 - 53

Introduction

This report presents the results of the actuarial valuation as of July 1, 2000 for the State Teachers Retirement System of Ohio.

The principal valuation results include:

- The unfunded accrued liability funding period, which is 23.1 years.
- The funded status of the plan determined as of July 1, 2000 based on the accrued liability and the market-related value of assets as of that date, which is 92.4%.
- The determination of the gain or loss as of July 1, 2000, which is a gain of \$2.1 billion.
- Annual disclosure as of July 1, 2000 as required by Statement No. 25 of the Governmental Accounting Standards Board.

The valuation was completed based upon membership and financial data submitted by the Retirement System.

Changes Since Last Year

Legislative and Administrative Changes

There was one legislative change that affects the funding of the System.

Benefit Improvement for Current Benefit Recipients and Active Members

Senate Bill 190 amended the Code to provide for an increase in retirement benefits for both current benefit recipients and active members.

For active members, the new law increases the current 2.1% formula to 2.2% of final average salary for those members with less than 35 years of service, and to 2.5% of final average salary for those members with 35 or more years of service.

For current benefit recipients, the law updates their original benefit to the 2.1% of final average salary formula and provides a one-time increase to restore 85% of their original benefit's purchasing power.

These changes increased the accrued liability of the System by approximately \$2.3 billion.

A summary of the benefits and contribution provisions reflected in the valuation is outlined in Table 11.

Actuarial Assumptions and Methods

The interest rate was changed from 7.5% to 7.75%. All other actuarial assumptions and methods are unchanged from last year. The change in the interest rate decreased the accrued liability of the System by \$1.4 billion.

The assumptions and methods are outlined in Table 10.

Health Care Contribution Rate

Historically, of the total employer contribution rate of 14%, the Board has allocated 2% for health care and 12% for pension and survivor benefits. For fiscal years 1998 through 1999, additional employer contributions were allocated toward health care. The health care contributions were 3½% for fiscal 1998 and 8% for fiscal 1999 and fiscal 2000. Effective for fiscal 2001 and thereafter, the Board has made a permanent change in the allocation of the employer contribution rate. Of the total employer contribution rate of 14%, the Board has allocated 4½% to health care and 9½% to pension and survivor benefits.

Five-Year History of Principal Financial Results

Net Gain (Loss)

The results of the valuation as of July 1, 2000 determine the net gain or loss for the year ended June 30, 2000. The net gain is \$2,108 million. The benefit improvements and interest rate change reduced the gain by \$935 million. The Board elected to use \$50.8 million to fund the supplemental benefit payments to retirees to be made during December, 2000. The remainder was used to reduce the unfunded accrued liability.

The analysis of the net gain for fiscal year ended June 30, 2000 is shown in Table 5. The following table shows a five-year history of the net gains or losses.

Funding Period

The funding period is the number of years required to liquidate the unfunded accrued liability. The following table shows a five-year history of the funding period along with the member and employer contribution rates:

1997	26.9	9.30	14.00
1996	28.4	9.30	14.00

Five-Year History of Funding Period

Funded Ratio

The System's funded status is measured by comparing the valuation assets with the accrued liability. The accrued liability is the present value of benefits accumulated to date under the System's funding method and reflects future pay increases for active employees.

On this basis, the System's funded ratio is 92.4% as of July 1, 2000. The funded ratio is based on a market-related value of assets of \$54.7 billion and an accrued liability of \$59.2 billion.

Reasons for Change in the Funded Ratio

The funded ratio increased from 89.7% as of July 1, 1999 to 92.4% as of July 1, 2000. The increase is due to the net effect of the benefit changes, interest rate change and experience gains and losses.

GASB No. 25 Disclosure

Statement Number 25 of the Governmental Accounting Standards Board established reporting standards for the annual financial reports of defined benefit pension plans. The statement requires disclosure of the "schedule of funding progress" and the "schedule of employer contributions" in the System's financial statements.

The "schedule of funding progress" shows historical trend information about the System's actuarial value of assets, the actuarial accrued liability and the unfunded actuarial accrued liability. The actuarial funded status is measured by comparing the actuarial value of assets (based on a 4-year moving market average value) with the accrued liability. For purposes of GASB Statement No. 25, the actuarial assets and accrued liability exclude assets in the Health Care Premium Stabilization Fund. The accrued liability is the present value of benefits accumulated to date under the System's funding method and reflects future pay increases for active employees. On this basis, the System's funded ratio is 92.0% as of July 1, 2000. The funded ratio is based on an actuarial value of assets of \$51.3 billion and an accrued liability of \$55.8 billion. Table 7 shows the schedule of funding progress information.

The "schedule of employer contributions" shows historical trend information about the annual required contributions (ARC) of the employer and the percentage of the ARC contributed to the System. The ARC is equal to the normal cost plus amortization of the unfunded actuarial accrued liability. The maximum period for amortizing the unfunded actuarial accrued liability permitted by GASB No. 25 is 40 years. The maximum amortization period decreases to 30 years in 2006. Of the total employer contribution rate of 14% of payroll, 4.5% is allocated to health care, leaving 9.5% allocated to pension and survivor benefits provided by the System. The employer contributions to the System are equal to 100% of the ARC. Table 8 shows the schedule of employer contributions.

Rate of Return

The investment return of the trust fund on a market value basis (i.e., total return including both realized and unrealized gains and losses) for fiscal years ended June 30, 1996 through 2000 is shown below. The return based on the valuation assets used for determining the System's funded status is also shown.

DEATH AFTER RETIREMENT: According to the 1983 Group Annuity Mortality Table (Projection 1994 - Scale H) with one-year setback in age for males and one-year set forward in age for females. Special mortality tables are used for the period after disability retirement.

FUTURE EXPENSES: The assumed interest rate is net of the anticipated future administrative expenses of the fund.

METHODS

ACTUARIAL COST METHOD: Projected benefit method with level percentage entry age normal cost and open-end unfunded accrued liability. Gains and losses are reflected in the accrued liability.

ASSET VALUATION METHOD: A 4-year moving market average value of assets that spreads the difference between the actual investment income and the expected income (based on the valuation interest rate) over a period of 4 years. The actuarial value shall not be less than 91% or more than 109% of market value.

PAYROLL GROWTH: 4½% per annum compounded annually.

REPLACEMENT OF RETIRING MEMBERS: The majority of members who retire do so effective July 1. These members are replaced by new members who are hired after July 1. As a result, new members are not reported on the census data. To compensate for this, assumed payroll for these new members is equal to the difference between actual total System payroll for the fiscal year just ended and reported payroll for members reported on the valuation date.

TABLE 10**DESCRIPTION OF ACTUARIAL ASSUMPTIONS AND METHODS**
(Continued)**DATA**

CENSUS AND ASSETS: The valuation was based on members of the System as of July 1, 2000 and does not take into account future members. All census and asset data was supplied by the System.
